Authorized Allegion Distributor

HARDWARE

When it comes to architectural hardware, we know you are looking for durability, strength, and quality.

Products used to secure the opening is the most important consideration when designing your application. Locksets, strikes, exit devices, bolts, and other hardware all factor into securing the opening. From mechanical to electrified, Warren Doors & Access Control will assist you in deciding on what hardware is best for your application. Our installation professionals are experienced and certified to install and service most hardware, including high security locks Kaba Mas CDX-10, Lockmasters LKM10K, Sargent and Greenleaf 2890 & 2740, among others. In addition, Warren Doors & Access Control has developed a time-tested process for pre-installing hardware on doors and frames in our shops to ensure the highest quality installation and products ready to quickly install on the jobsite.
